MiR-489-3p inhibits cervical cancer cell migration and invasion through regulating Wnt/ β -catenin signaling pathways [Retraction]

Pan YJ, Dai JH, Liao YF, Xu J. *International Journal of Clinical and Experimental Pathology*. 2017;10:290-297.

Recently, the author has done further research on the above cell experiments. The author found, however, that the follow-up results were very different from their expected results. In the process of searching for the cause, the

author determined that the experimental results in this article were wrong because the author could not repeat the previous results. This led the author to apply incorrect conclusions to subsequent studies. Therefore, the entire article has been retracted in accordance with this journal's policy and editorial decision.
